

Cirrus Now Runs on Windows 2000

Cirrus V4.0 is compatible with all versions of Windows - 95 through 2000. Cirrus V4.0 is available on www.duats.com/cirrus.shtml, on CD, or through e-mail.

E-mail - Using e-mail you can receive an upgrade to Cirrus V3.03 or the complete Cirrus V4.0 program.

Upgrade - The upgrade consists of a new executable (Cirrus.exe) and two new help files (Cirrus.hlp and Cirrus.cnt). This is just an upgrade and the files are to replace the files with the same name currently in the directory where the Cirrus V3.03 program resides. The upgrade does not include the latest Airport/NAVAID data files. That can be downloaded from the above Web Site.

Complete program - The complete Cirrus V4.0 program will be distributed in three e-mails. Instructions for loading the program from these files will be provided with the e-mail.

Mailing - CDs will be available by the end of July for mailing and will be distributed at Oshkosh in the DynCorp DUATS booth. So, stop by the booth and receive your latest version of Cirrus. We are located in Hangar C, Booth #3017-18. If you are not able to join us at Oshkosh this year and wish to receive the latest version on CD ROM, you can call 1-800-345-3828 or e-mail to duats@dyncorp.com. In both cases, provide a complete address and telephone number.

Downloading - Windows 95, Windows 98, Windows NT and Windows 2000. From the "Cirrus Software for DUATS" page, go to the paragraph "Download Cirrus Software."

Windows Version	Cirrus Version	Instructions	Software Download	Size (bytes)
95, 98, NT, 2000	4.0	Instructions	cirrus4_0.exe	4139282
3.1, 3.11, 3.1x (incl. Windows for Workgroups)	2.2	Instructions	setupex2.exe	3178020

Note: the file size depicted here is only representative of the actual file size displayed on the DUATS Web site.

1. Click on the hyperlink to download the file cirrus4_0.exe. The download default directory is c:\temp, or select a directory of your choice.
2. After the cirrus4_0.exe file is downloaded, use Windows Explorer to open the directory containing the file.
3. Right-click on the cirrus4_0.exe file and select Properties. Verify that the file size has the same number of bytes as listed in the download table. If not, you did not receive a complete file. Delete the file and download again.
4. Double-click on the cirrus4_0.exe file. This will unzip the files required for installation into the c:\temp directory.
5. Now double-click on the setup.exe file that was unzipped. Install shield will load Cirrus onto your hard drive.

If you have problems downloading, provide an address and we will send you a CD.

Creating a desktop shortcut-To create a desktop shortcut, open Windows Explorer, select the directory with Cirrus V4.0, right click once on Cirrus.exe and drag it to your Desktop. Release the right mouse button and select shortcut. The Cirrus icon is now on your Desktop allowing you to click the icon whenever you want to run Cirrus.

Cirrus Data Updates

The Cirrus Airport and Navigational Aids database is available on a 56-day update basis.

Airports Included	File	Size (bytes)
All airports	cu_rnavall.exe	651707
Runways of 2,500 ft or more	cu_rnav25.exe	428951
Runways of 5,000 ft or more	cu_rnav50.exe	157798

These files are updated every 56 days.

To reduce download time and make Cirrus display less cluttered, database updates are now available in three versions: all airports, airports with at least one runway of 2,500 feet or more, and airports with at least one runway of 5,000 feet or more. Note: The type of runway and its surface could be of any construction: asphalt, concrete, turf, etc. Please check the FAA's Airport/Facility Directory or other official information to ensure that the airport's runways will meet the needs of your aircraft for landing and takeoff.

Please retain your DUATS Newsletters for future reference.

DUATS...Still the Fastest Way into the Air & Still Free

Download the latest version of the Cirrus software 4.0 from either the Internet or place your order by calling 1-800-345-3828 or 1-703-818-4634 or e-mail duats@dyncorp.com
