

DUATS FLYER

AOPA Edition

Issue No. 76

October 2008

Top Ten reasons to use CSC DUATS

Everyone has a TOP TEN list nowadays and CSC DUATS is no exception. Here's ours:

10. GET an official pre-flight briefing - A CSC DUATS route briefing contains the same elements contained in a route briefing that is provided by an FAA Briefer. The CSC DUATS system has been rigorously tested and is continuously monitored by the FAA.

9. Have access to the same weather that is available in the FAA's ARTCCs - DUATS has access to FAA's secure aviation network and provides the aviation weather as soon as it is available to the FAA.

8. Get your FAA weather in plain language - CSC DUATS lets you choose your briefing output - either in the FAA abbreviated form, plain language translated, or both. CSC DUATS will even translate the time from UTC to your selected time zone.

7. Get parsed NOTAMS - Since January, the FAA has classified NOTAM D's with 12 keywords. CSC DUATS parses the NOTAMs and gives them to you ordered by keywords. Now that the FAA has done away with local NOTAMs and incorporated them into NOTAM D's, you have access to ALL the NOTAMs you need to plan your flight.

6. Have an automatic record of your briefing - CSC DUATS records all of your sessions and stores them for 15 days. Your receipt of the data can be proven, should the need ever arise.

5. Get access to current graphics - CSC DUATS brings you current conditions, forecasts, radar and satellite images. CSC DUATS has 20 regional NEXRAD graphics that are updated every 5 minutes and can be put in motion!

4. Use an Award winning flight planner - More than 15 years of refinement have gone into the CSC DUATS ONLINE flight planner (available in Web DUATS and Golden Eagle). You can generate optimized flight plans using real-time winds aloft forecasts and produce flight logs to take along with you on your next flight.

3. File your flight plans online - CSC DUATS lets you file flight plans up to 24 hours in advance. Our 24 by 7 help desk will correct and retransmit any flight plans that may get rejected by the FAA.

2. Have a choice in access - CSC DUATS provides you with a choice of access methods. Use our quick and easy website at www.duats.com, or take advantage of our FREE advanced graphical interface, Golden Eagle FlightPrep, which runs on your PC and connects either through the Internet or to our toll-free 800 dial in lines. A copy of Golden Eagle FlightPrep can be obtained by downloading from www.duats.com or requesting a CD be mailed by calling 1-800-345-3828

And now for the number 1 reason to use CSC DUATS -

1. It's FREE!!! - The FAA sponsors the service for pilots to promote safety in the skies. Take advantage of this service and use it often to make the best and safest decisions before you fly.

Tips on Getting Started with Golden Eagle FlightPrep

There are two ways of getting your copy of the FREE advanced graphical interface to the CSC DUATS system. The quickest way for most people is to download the program from our website at www.duats.com. On the welcome page, scroll down to the bottom and click on "Golden Eagle and Cirrus Information page" link. Once you have followed the link, you will see the "Free Download now" link after the first few paragraphs. Follow the directions above the link to save the program and install it. Or you can request a copy of the

Golden Eagle FlightPrep on CD by calling CSC DUATS at 1-800-345-3828 or emailing a request to duats@duats.com.

Once loaded, you need to do several things to ensure you are taking advantage of all of the program features and functions. First you need to create a pilot profile. Using the "Edit" drop down menu select either "Pilot" or "Preferences"; this will provide you with a series of tabs, one of which is labeled "Pilots".

Select "Pilots" and this will present you with a Pilot Information form. The information you supply is used to fill out corresponding fields in your flight plan, but most importantly, it saves your DUATS access code and password which is required to activate the DUATS features and functions. Multiple pilot profiles can be entered.

Now you need to create one or more aircraft profiles. Again using the "Edit" dropdown menu select either "Aircraft" or "Preferences", and then select the tab labeled "Aircraft". There are a number of pre-stored profiles available to select from or you can create a new profile. To use an existing profile make your selection, then click the "Edit" button and modify the profile to fit your aircraft. It is important to enter the performance based on the way you fly your aircraft to ensure the flight planner provides accurate fuel burns and time for the selected route.

If your aircraft type is not listed in the pre-stored list, select "Add", provide a name and save. You will now be presented with all the blank forms necessary to create an aircraft profile.

You will need to complete as a minimum the "General" and "Performance". The general information is used by GoldenEagle to fill out the corresponding fields in the flight plan and the performance profile to be used by the flight planner. If you desire to use the Weight and Balance feature, please refer to DUATS Newsletters 65 and 66, both available on WEB DUATS home page www.duats.com.

Planning your first flight

Go to the main screen by selecting the "Charts" tab, select a departure and destination, the routing type, and then click on the "Plan It" box:

Congratulations! Your flight route has now been planned and drawn on the graphic charts. For additional help in learning how to use the product, go to the DUATS website, click on the "Golden Eagle and Cirrus Information" page. There you will find links for a "Jump Start Tutorial" and a "Golden Eagle video Tutorial".

The online Newsletters available on the home page of www.duats.com have many articles that highlight and teach you how to use the features of the Golden Eagle FlightPrep and Web DUATS programs. Click on the "DUATS Flyer Newsletters" link to see an index and description of past issues.
